The Colorado Association of Mechanical and Plumbing Contractors Partners with the Colorado Safety Association to Offer Safety Training and More

DENVER – November 29, 2013— The Colorado Association of Mechanical and Plumbing Contractors (CAMPC), Colorado’s leading professional association for the state’s heating, air conditioning, refrigeration, ventilation, plumbing, piping and mechanical contractors, announces an alliance agreement with the Colorado Safety Association (CSA), the state’s leading safety resource for business, to provide safety information, training and consulting services beginning January 1, 2014. CSA is located on the first floor in the same building as CAMPC at 1114 W. 7th Avenue, Suite 150, Denver, making it convenient for members to access the year-round training.

“We are very excited to partner with the Colorado Safety Association which allows us to provide additional safety resources to our membership including quarterly Breakfast with OSHA meetings, safety awards, conferences and a safety media library,” said Dave Davia, CAMPC’s executive vice president and CEO.

“We are committed to increasing access to resources that maximize worker safety and health protection. Our strategic alliance with CAMPC broadens our reach within the construction industry and provides an exceptional safety and health resource for mechanical and plumbing contractors in Colorado,” said Liz Couture, CSA Executive Director.

Courses available to CAMPC members, at discounted registration fees, include occupational safety training programs, an annual safety and health conference, forklift training, defensive driving, OSHA training, first aid, CPR and AED training. A full course list is available at www.ColoradoSafety.org.

ABOUT CAMPC:
The Colorado Association of Mechanical and Plumbing Contractors is a management association representing owners and managers of firms involved in heating, air conditioning, refrigeration, ventilation, plumbing, piping and mechanical service throughout Colorado. Under various names the association has promoted the industry and its members since 1941. Today CAMPC serves approximately 150 member companies. CAMPC includes the Heating, Air-conditioning, Refrigeration Professionals of Colorado, Mechanical Contractors of Colorado, Mechanical Service Contractors of Colorado, National Certified Pipe Welding Bureau – Colorado Chapter, and Plumbing-Heating-Cooling Contractors of Colorado.

ABOUT CSA:
The Colorado Safety Association (CSA) is a not-for-profit, non-governmental educational organization specializing in occupational safety and health issues. CSA was founded in 1968 and is a training agency of the National Safety Council and a member of the Association of Reciprocal Safety Councils.
